The Care Manager has the responsibility and accountability for coordinating all aspects of the patient's care. A "Health Home" is a care management service model whereby all of an individual's caregivers communicate with one another so that all of a patient's needs are addressed in a comprehensive manner. This is done primarily through a Care Manager who oversees and provides access to all of the services an individual needs to ensure that they receive everything necessary to stay healthy, out of the emergency room and out of the hospital. The duties require the incumbent to work under the direction of a supervisor who may define or limit the work to be performed. Employees in this class are expected to meet with professionals of agencies in or outside of the community to obtain assistance and guidance for patients. Does related work as required.
